Subject AB 222: SUPPORT

Dear Assembly Member Fuentes:

We write in support of AB 222, which we understand is scheduled to be the subject of a hearing on April 27, 2009.

Our company, Global Energy, Inc., is an environmental energy technology company with gasification and advanced fuel technology expertise in developing, owning and operating gasification plants in the USA and the UK. We have been in business for over 20 years.

Having read AB 222, which we understand essentially updates the Integrated Management Act of 1989 to incorporate changes that will enable and expedite the production of advanced non-food derived biofuels, green power and other biobased products from biomass, we support the bill and urge its passage. We understand that AB 222 will encourage new investments in clean advanced energy technology facilities within California, while retaining California's stringent environmental protections. As we consider the possibility of siting new projects in California, and bringing significant investment and jobs to your state, it is critical that legislation be in place to allow these things.

If you or committee staff have any questions or comments about this letter, please feel free to contact our Chief Technology Officer, Dr. Steven C. Vick at (513) 621-0077, or by e-mail at [SCVick@GlobalEnergyInc.com](mailto:SCVick@GlobalEnergyInc.com).

Best Regards,
